

Inman Aligner

1

StoneRock Dental Care is proud to introduce a new leading edge cosmetic dentistry procedure - The Inman Aligner. This revolutionary concept sees protruding or crowded teeth transformed in a matter of weeks.

Did you have years of orthodontic treatment and unsightly braces, only to see your teeth slip back to their former badly positioned ways?

Are you one of many who is generally unhappy with the alignment of your teeth and longing for a beautiful, straight smile?

Questions:

Why would I need the Aligner?

Until now the alternatives to straighten front teeth involved either long and expensive orthodontic treatments or destructive and expensive restorative treatments such as veneers or crowns. Crossed over lower teeth that can appear with age were always difficult to correct minimally. But with the arrival of the Inman Aligner, all that has changed.

What does it do?

The Inman Aligner is a cost effective removable orthodontic appliance that moves teeth in a fraction of the time of other systems. It aligns crowded or protruding anterior teeth with two opposing spring loaded aligner bars. Surprisingly this gentle pressure is the quickest way to move teeth but it also makes the treatment very safe and kind to teeth.

How long does it take?

Patients love the speed of treatment and it's changing the face of dentistry. The average treatment time is only 4-16 weeks.

Inman Aligner

2

So how does it work?

The Inman Aligner is a clear plastic retainer with two spring loaded bars that fits easily over the upper or lower front four teeth. It provides a constant gentle pressure, easing them back into place relatively quickly.

The Aligner is easy to use and can be taken out at any time. The ideal time to be worn each day is 18-20 hours, allowing eating and brushing to be continued as normal. Once the teeth have been moved to the desired position, a discreet retainer is positioned on the backs of the teeth to hold them in place in their new position.

What does the treatment involve?

During the first consultation, an impression is made of the teeth. In the second appointment, teeth are smoothed to make room for movement and the aligner is fitted. For the duration bi-weekly or monthly visits are required to review and adjust the aligner.

Inman Aligner

3

Who can do this treatment?

Only certified Inman Aligner dentists can provide them. Russell Blanchard has achieved this certification and provides Inman Aligners at StoneRock Dental Care.

How much does it cost?

The Inman Aligner is priced from £1495. Cases will be treatment planned individually and all fees will be discussed and confirmed in writing. Please contact us for more details.
